PROFILE SUMMARY

Motivated and fast-learning **Python Full-Stack Developer** with hands-on experience in **Python, Django, React.js, REST APIs, MySQL, and front-end development** through academic projects and internships. Strong understanding of backend logic, UI development, and database-driven applications. Seeking a Python/Django or ReactJS role to apply full-stack skills and contribute to real-world product development.

TECHNICAL SKILLS

Backend Development: Python, Django (Basics), Flask, Fast API, REST API development, Authentication, Routing, MVC concepts

Frontend Development: React.js (Components, Hooks, Props, Routing), HTML5, CSS3, JavaScript, Responsive UI, State management

Databases: MySQL, SQLite, CRUD operations, Joins, Queries

Programming & Tools: Python, JavaScript, Java (basic), C (basic), Git & GitHub, Postman, VS Code, Jupyter Notebook

Machine Learning: Pandas, NumPy, Scikit-learn, Data preprocessing & model building

INTERNSHIP EXPERIENCE

Machine Learning & Python Intern - Krify Software Technologies

Feb 2024 – Apr 2024

- Built Python-based ML pipelines for prediction use cases.
- Performed **data cleaning, preprocessing, API testing**, and reusable backend logic creation.
- Strengthened understanding of Python modules, problem-solving, and backend scripting.

Web Development Intern - Motion Cut

Oct 2024 – Nov 2024

- Designed responsive interfaces using **HTML, CSS, JavaScript**.
- Improved UI layout, performance, and reusability.
- Built small web components similar to React component structure.

EDUCATION

Master of Computer Applications (MCA)

Adikavi Nannaya University | 2022–2024 | CGPA: 7.82

Bachelor of Science (Computers)

Sri Nikhila Degree College | 2019–2022 | CGPA: 8.24

CERTIFICATIONS

- Web Development Internship – Motion Cut
- Machine Learning with Python Internship – Krify Software Technologies
- Java Programming Certification

PROJECTS

1. Face Recognition Attendance System (Full Stack Python Project)

Tech: Python, OpenCV, Tkinter, MySQL

- Built end-to-end system with UI + backend + database integration.
- Implemented CRUD operations in MySQL for attendance logs.
- Designed modular backend flow suitable for Django migration.

2. Multi-Disease Prediction System

Tech: Python, Pandas, NumPy, Scikit-learn, Streamlit

- Developed ML classification models & user-interface dashboard.
- Converted backend logic into API-ready structure.

3. Profile Management Application – React + TypeScript + Redux Toolkit

Tech: React, TypeScript, Redux Toolkit, React Router, Material UI, LocalStorage, Vite

- Built a fully functional **profile creation, editing, viewing, and deletion** system with real-time form validation and clean UI.
- Implemented **global state management** using Redux Toolkit and persistent storage via LocalStorage.
- Designed reusable UI components using **Material UI** and implemented a smooth navigation flow through React Router.
- Created mock API with promise-based simulation for handling async flows.
- Deployed on **Vercel**, ensuring production-ready build optimization.

Live: <https://profile-management-app-two.vercel.app>

4. Developer Portfolio Website

Tech: HTML, CSS, JavaScript

- Built a responsive personal portfolio showcasing all work.

5. Real-Time Object Detection

Tech: Python, OpenCV

- Implemented object detection system with real-time inference.

LANGUAGES

- **English** – Professional Proficiency
- **Telugu** – Native
- **Hindi** – Working Proficiency

STRENGTHS

- Strong problem-solving ability
- Ability to learn new technologies quickly
- Good communication skills
- Passion for backend & full-stack development
- Team collaboration & code ownership

DECLARATION

I hereby declare that all the information provided is true and correct to the best of my knowledge.
